PROFILE SUMMARY

Motivated and detail-oriented Entry-Level Java Developer with hands-on experience in building applications using Java, Spring Boot, and SQL. Strong foundation in object-oriented programming and web development, with the ability to write clean and efficient code. Eager to apply technical knowledge, problem-solving skills, and a passion for learning in a collaborative and growth-oriented software development environment.

SKILLS

- **Web Technologies** - HTML, CSS, JavaScript, React
- **Programming Languages** - Java
- **Database** - MySQL
- **Frameworks/Tools** - Spring Boot, Eclipse IDE, Visual Studio

PROJECTS

HR, Manager, Employee Management System   LINK

- Developed a role-based system with HR managing managers & managers managing employees using full CRUD and employees view the manager& projects status. Implemented OTP-based authentication, REST API, MySQL, and Spring Boot with responsive HTML/CSS/JS frontend for secure and efficient workflows.
- Tools Used: HTML, CSS, JavaScript, Spring Boot, MySQL

Purchase and sale Management System   LINK

- The Purchase and Sales Management System project stores the history of items purchased by the owner from other shops. It displays the current stock of items in the shop, the purchase history of customers with date and time, and also shows profit or loss. This project helps users refer to the above data for inventory tracking and financial analysis. It also supports efficient decision-making by providing clear insights into sales trends and item movement over time.
- Tools Used: HTML, CSS, JavaScript, Springboot, MySQL
